

CARTEC

BDE 500 K-WV - Roller brake tester for motorcycles, Analogue version, prepared for weighing system

Key Features

- Analogue display: display range 0 - 3 kN
- Zinc-coated roller set
- Rollers with expanded metal mesh and long-life plastic coating
- Splash-proof motor
- Rust-proof feeler rolls
- Interface for printer
- Determination of rolling friction (heavy brake)
- Determination of ovality (drum / disc)

Specifications

Brake tester - Axle weight max. (kg)	1000
Brake tester - Roller diameter (mm)	206
Brake tester - Roller length (mm)	300
Brake tester - Roller coefficient: dry / wet	> 0.6
Brake tester - Idling speed (km/h)	5.5
Brake tester - Power supply (V / Hz)	400 / 50
Brake tester - Supply lead (mm ²)	5 x 2.5
Brake tester - Fuse rating, slow-blow (A slow-blow)	16
Brake tester - Motor power (kW)	2.5
Brake tester - Height (mm)	260
Brake tester - Width (mm)	1020
Brake tester - Depth (mm)	560
Brake tester - Weight (kg)	150
Display cabinet - Measuring range (kN)	0 - 3
Display cabinet - Height (mm)	600
Display cabinet - Width (mm)	400
Display cabinet - Depth (mm)	200
Display cabinet - Weight (kg)	25

Options

Motorcycle fastener - pneumatically controlled
Pedal pressure transducer
Hand operated force transducer
Infrared remote control
Column or swivel wall support for display cabinet

Delivery

Analogue display cabinet, display range 0 - 3 kN
Roller set
15 m connecting lead

Versions

With weighing unit system
With weighing system preparation
230 V / 50 Hz
